TECHNICAL   SPECIFICATION

CONTENTS

E Ink Holdings Inc.   **PM070WL5**

1.Application

This data sheet applies to a color TFT LCD module, PM070WL5.
The application of panel are OA product, portable DVD, car TV, it must use Analog to Digital driving board), which requires high quality flat panel display.
       E Ink assume no responsibility for any damage resulting from the use of the device which does not comply with the instructions and the precautions in this product specification.
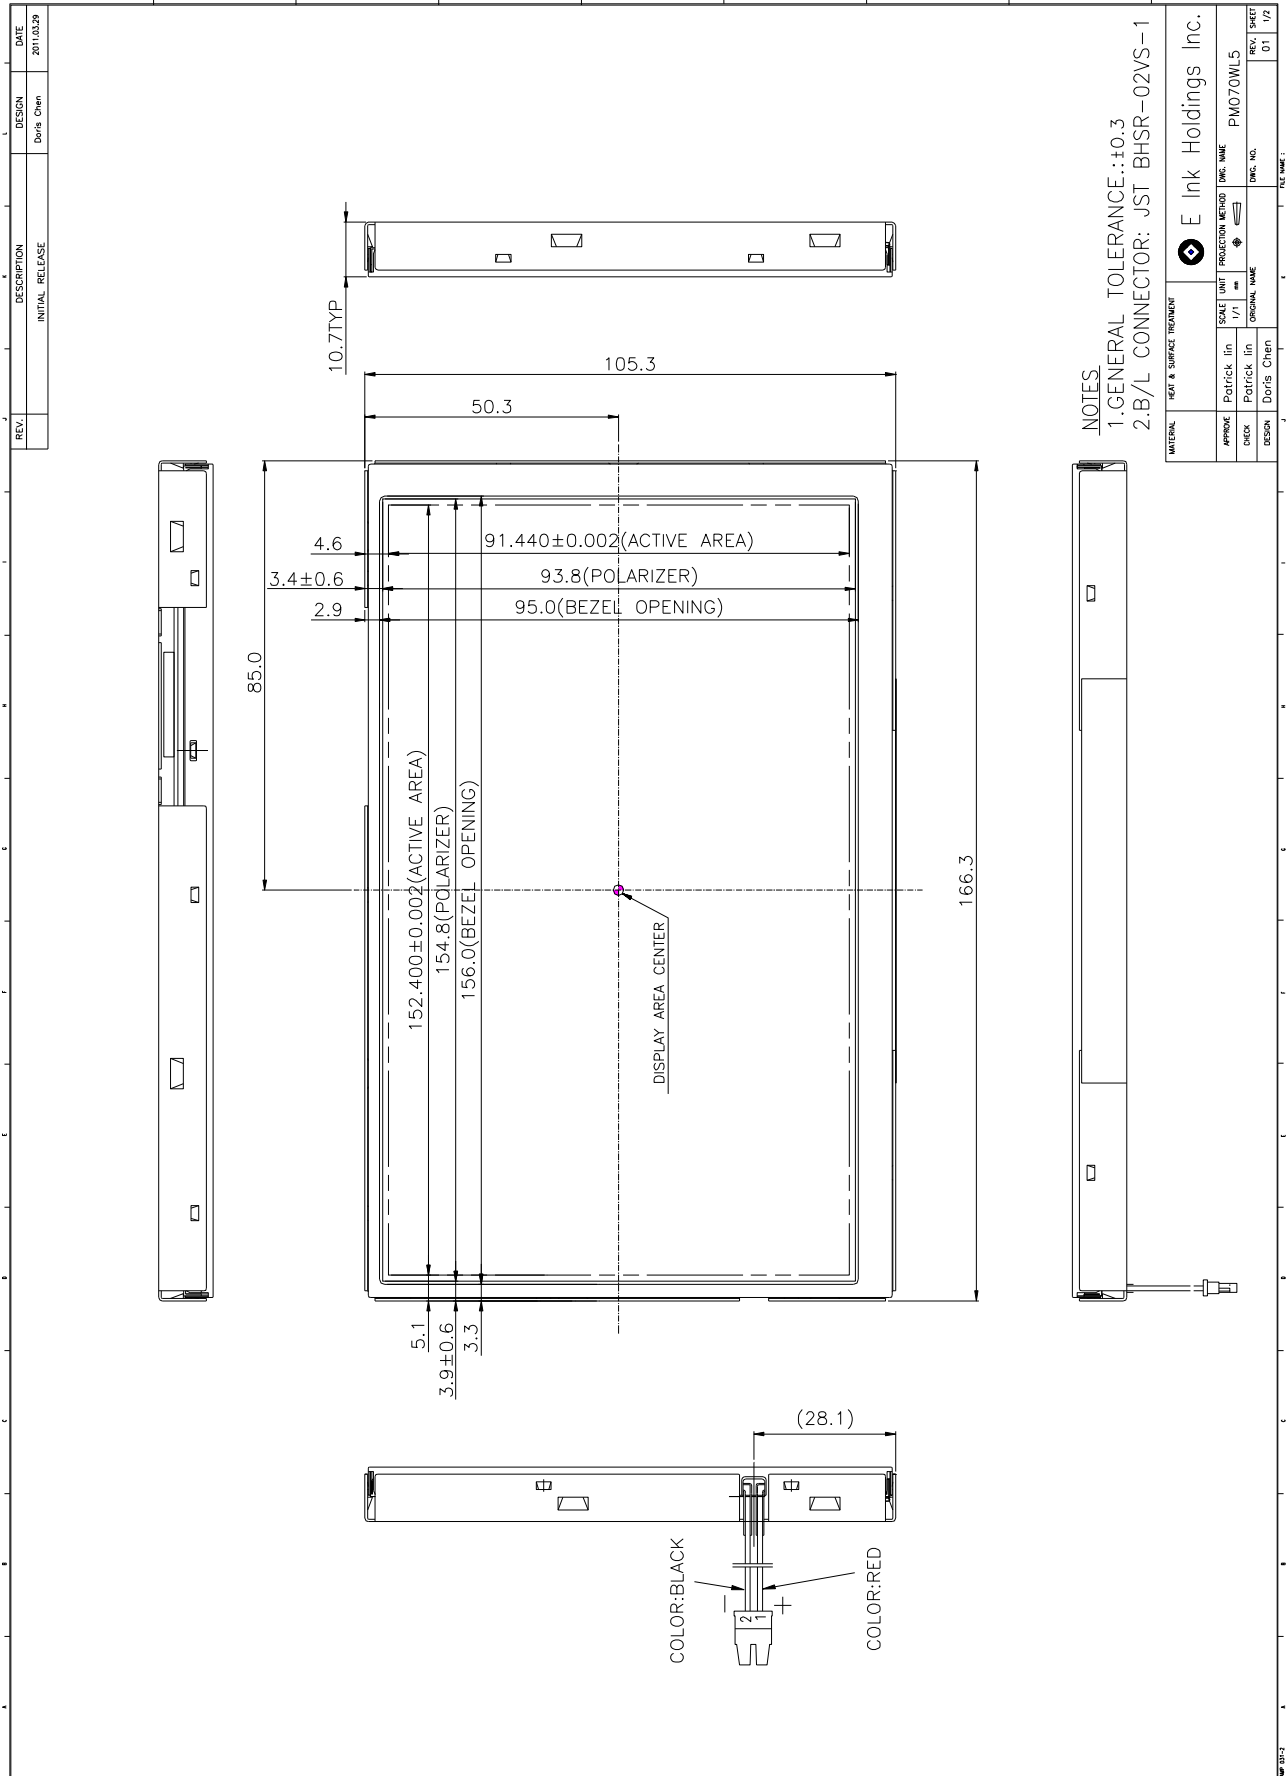

2. Features

   . Wide VGA (800*480 pixels) resolution
   . Amorphous silicon TFT LCD panel with LED back-light unit
   . Pixel in stripe configuration
   . Thin and light weight
   . Display Colors：262,144 colors
   . 3.3V LVDS interface standard: THC63LVDF64A as receiver
   . +3.3V DC supply voltage for TFT LCD panel driving
   . Wide viewing angle
   . Polarizer surface treatment with Low-Reflective coating

3.Mechanical Specifications

Parameter	Specifications	Unit
Screen Size	7.0(diagonal)	inch
Display Format	800×(R, G, B)×480	dot
Display Colors	262,144	
Active Area	152.4(H)×91.44(V)	mm
Pixel Pitch	0.1905(H)×0.1905(V)	mm
Pixel Configuration	Stripe	
Outline Dimension	166.3(W)×105.3 (H)×10.7 (typ.) (D)	mm
Weight	265±10	g
LED Back-light	33-LED	
Surface treatment	Low-Reflective and Wide View Film	
Display mode	Normally white

14. Handling Cautions

14-1) Mounting of module

a) Please power off the module when you connect the input/output connector.

b) Please connect the ground pattern of the inverter circuit surely. If the connection is not perfect, some following problems may happen possibly.

     1. The noise from the backlight unit will increase.

     2. The output from inverter circuit will be unstable.

     3. In some cases a part of module will heat.

c) Polarizer which is made of soft material and susceptible to flaw must be handled carefully.

d) Protective film (Laminator) is applied on surface to protect it against scratches and dirt

e) Please following the tear off direction as figure14-1 to remove the protective film as slowly as possible, so that electrostatic charge can be minimized.

14-2) Precautions in mounting

a) When metal part of the TFT-LCD module (shielding lid and rear case) is soiled, wipe it with soft dry cloth.

b) Wipe off water drops or finger grease immediately. Long contact with water may cause discoloration or spots.

c) TFT-LCD module uses glass which breaks or cracks easily if dropped or bumped on hard surface. Please handle with care.

d) Since CMOS LSI is used in the module. So take care of static electricity and earth yourself when handling.

14-3) Adjusting module

a) Adjusting volumes on the rear face of the module have been set optimally before shipment.

b) Therefore, do not change any adjusted values. If adjusted values are changed, the specifications described may not be satisfied.

14-4) Others

a) Do not expose the module to direct sunlight or intensive ultraviolet rays for many hours.

b) Store the module at a room temperature place.

c) The voltage of beginning electric discharge may over the normal voltage because of leakage current from approach conductor by to draw lump read lead line around.

d) If LCD panel breaks, it is possibly that the liquid crystal escapes from the panel. Avoid putting it into eyes or mouth. When liquid crystal sticks on hands, clothes or feet. Wash it out immediately with soap.

e) Observe all other precautionary requirements in handling general electronic components.

f) Please adjust the voltage of common electrode as material of attachment by 1 module.
